I. POSITION AND QUALIFICATIONS

Q. PLEASE STATE YOUR NAME AND ADDRESS.

A. My name is Stephen N. Ragland. My business address is 1601 Bryan Street, Dallas, Texas 75201.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am employed by TXU Business Services and hold the position of Management Support Manager - TXU Business Services.

Q. PLEASE OUTLINE YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL QUALIFICATIONS.

A. I graduated from East Texas State University in 1977 with a Bachelor of Science degree in Business Administration. I was employed by Dallas Power & Light Company in January 1979 as a Junior Accountant and worked in various areas of the corporate accounting department. In December 1992, I was employed by TXU Business Services (formerly TU Services, Inc.) and appointed Management Support Manager - Texas Utilities Fuel Company (TXU Fuel). In August 1996, I assumed the position of Management Support Manager - Fuels. I held that position until December 1997, when I became the Management Support Manager for the Distribution Business Unit - System Operations. I was named to my present position in November 1998. I am a Certified Public Accountant in the State of Texas.

Q. WHAT IS THE NATURE OF YOUR RESPONSIBILITIES WITH TXU BUSINESS SERVICES?

A. As Management Support Manager for TXU Business Services, I am responsible for providing the following business decision support services; business plan preparation assistance, including annual budgets; monitoring of, and reporting on, financial and operating performance; and ensuring input of appropriate billing metrics into the Financial Information Management system for billing the cost of the services provided by TXU Business Services

1 to Texas Utilities Company ("TXU Corp") affiliates.

2 Q. HAVE YOU EVER TESTIFIED BEFORE THE PUBLIC UTILITY
3 COMMISSION OF TEXAS ("COMMISSION")?

4 A. No.

5 **II. PURPOSE OF TESTIMONY**

6 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

7 A. My testimony will discuss transactions between TXU Business Services and
8 the subsidiaries, divisions, and operating units within TXU Corp (hereinafter
9 collectively referred to as "TXU entities") following the "unbundling" of TXU
10 Electric Company ("TXU Electric"). My testimony shows that the necessary
11 procedures, systems, and processes are in place to prevent cross-
12 subsidization between affiliates. My testimony also supports the
13 reasonableness and necessity of any expenses billed by TXU Business
14 Services to TXU entities and demonstrates that the prices charged by TXU
15 Business Services to any one TXU entity are no higher than the prices
16 charged by TXU Business Services to other TXU entities or to a non-
17 affiliated third party for the same class of items.

18 **III. ORGANIZATION AND FUNCTION OF TXU BUSINESS SERVICES**

19 Q. WHAT SERVICES DOES TXU BUSINESS SERVICES PROVIDE?

20 A. TXU Business Services provides accounting, financial, information
21 technology, personnel, procurement, environmental, real estate, corporate
22 secretarial, facilities management, and other services for TXU entities. All
23 of the services provided by TXU Business Services are billed to each TXU
24 entity at cost with no return on equity or profit added. Exhibit SNR-1
25 provides an organization chart of TXU Business Services on September 30,
26 1999.

27 Q. PLEASE DESCRIBE THE FUNCTIONS OF TXU BUSINESS SERVICES
28 THAT PROVIDE SERVICES TO TXU ENTITIES.

1 A. The following functions, or service providers, provide services to TXU
2 entities:

3 (1) Accounting/Controller. This function provides basic accounting
4 and financial services, including payroll, accounts payable, fixed asset
5 accounting, financial information, financial reporting, and financial advisory
6 services.

7 (2) Administrative Services. This function provides services, such as
8 copier and print services; document storage, filing, and retrieval of
9 documents needed to support the acquisition, maintenance, and disposal of
10 property; acquisition and management of land, minerals, and rights-of-way;
11 maintenance, administration, and registration services for light and heavy
12 vehicles used to install and maintain assets; and operation of service
13 vehicles.

14 (3) Corporate. This function does not provide services, but is more
15 a repository for various necessary business costs, such as leasehold
16 improvements, Office of the President, depreciation, interest, and taxes.

17 (4) Corporate Services. This function provides state, local, and
18 federal tax services; retirement, thrift plan, and other employee benefit
19 administration; risk management services; claims and legal administration
20 services; and other similar services.

21 (5) Communications. This function provides communication to and
22 from the public regarding company matters as well as 24-hour media
23 availability to deal with any company, system, or customer matter that
24 demands immediate attention; provides advertising services to promote
25 public safety and inform customers of methods, products, and services
26 related to electricity or natural gas service; and provides a resource center
27 in which information can be procured in a timely manner to meet various
28 business needs. It also provides a communication vehicle to employees so

1 that they may stay informed of industry, regulatory, company, and other
2 information of general concern to the employee.

3 (6) Environmental. This function obtains and maintains all
4 necessary environmental permits and maintains compliance with
5 environmental permits, approvals, laws, and regulations.

6 (7) Finance. This function provides all services related to funds
7 management, securities administration and compliance, investor and lender
8 communications, and financial planning research and analysis.

9 (8) Financial Planning and Management Support. This function
10 provides support to the business decision process, including evaluating,
11 implementing, and monitoring TXU Corp business unit strategies and
12 project/investment opportunities, which enables business units to make
13 informed choices among business alternatives in a changing financial,
14 environmental, regulatory, and legal environment.

15 (9) Human Resources. This function provides services relating to
16 staffing and placement, including employee development, training, and
17 safety.

18 (10) Information Technology. This function provides dependable
19 communication within the system network through voice, data, and radio
20 devices; timely access to financial and operating data through mainframe,
21 server, and intranet infrastructure; training and deskside support for personal
22 computer equipment and applications; business solution consulting; and
23 application development and maintenance.

24 (11) Internal Audit. This function provides internal audit services.

25 (12) Procurement Services. This function provides procurement
26 management, purchasing, contracts, minority business development, and
27 related services.

28 (13) Regulatory Affairs. This function provides services to represent

1 TXU entities in rate and tariff proceedings and rulemakings before regulatory
2 authorities.

3 (14) Research and Development. This function stays abreast of
4 emerging technology and maintains relationships with universities,
5 departments, and institutions that facilitate receiving appropriate benefits
6 from any research investments made.

7 (15) Government Affairs. This function provides a means for
8 communication between TXU entities and governmental agencies regarding
9 legislative and regulatory issues.

10 (16) Public Policy. This function provides for development and
11 communication of public policy strategies and positions.

12 With a few exceptions, each of these functions is then divided into
13 various "projects" or "activities" (these terms are used synonymously). Most
14 TXU Business Services activities are directly charged or assigned to the
15 subsidiaries or divisions utilizing separate activity/project codes. Some
16 activities, however, are combined with other activities into what are termed
17 "processes."

18 Q. PLEASE DESCRIBE THESE PROCESSES UTILIZED.

19 A. The two processes utilized are:

20 (1) Human Resources. This process provides services for: design
21 and administration of salary plans; benefit design and administration of all
22 welfare and qualified benefit plans (*i.e.*, workers compensation, health care,
23 HMOs, accidental death and dismemberment, and retirement and thrift
24 plans); compliance with Equal Employment Opportunities Commission
25 requirements and affirmative action programs; compliance with Occupational
26 Safety and Health Administration workplace safety requirements;
27 development of a highly skilled workforce; and consistent administration of
28 employee relations activities, including counseling, discipline, and

1 terminations.

2 (2) Procure Resources. This process utilizes systemwide
3 procurement leverage to provide cost-effective, timely, reliable, and prudent
4 procurement of, and payment for, goods and services; efficient and effective
5 management of inventory investments; and optimization of the net return
6 from the reuse, disposal, or sale of surplus and salvage materials and
7 equipment.

8 Q. WHY WERE THOSE TWO PROCESSES INITIALLY ESTABLISHED?

9 A. Each of the two processes was initially developed in recognition of the fact
10 that the provision of certain broad areas of service actually requires various
11 different activities from numerous different functional areas. For example,
12 while most of the Human Resources process involves services provided by
13 the Human Resources function, it also involves the payroll activity service
14 provided by the Accounting function, as well as certain benefit plan
15 administration services provided by the Corporate Secretary function. Use
16 of processes supports efficient delivery of services by providing for improved
17 communication and cooperation within TXU Business Services and allowing
18 for a more streamlined service delivery process.

19 Q. ARE PROCESSES DIVIDED INTO ACTIVITIES SIMILAR TO THE MANNER
20 IN WHICH FUNCTIONS ARE DIVIDED INTO ACTIVITIES?

21 A. Yes. Human Resources and Procure Resources are divided into activities.

22 Q. IS THE "ACTIVITY" OR "PROJECT" LEVEL THE BASIS UPON WHICH
23 SERVICES ARE PROVIDED TO TXU ENTITIES?

24 A. Yes.

25 Q. WHAT SERVICES DOES TXU BUSINESS SERVICES CURRENTLY
26 PROVIDE?

27 A. Services provided by TXU Business Services are captured under
28 activities/projects. These activities/projects are listed and defined in my

1 Exhibit SNR-2.

2 Q. WILL TXU BUSINESS SERVICES CONTINUE TO PROVIDE THESE
3 SERVICES AFTER UNBUNDLING?

4 A. Yes. While TXU Business Services may, over time, add or delete
5 activities/projects as its clients may desire, the basic services provided will
6 remain unchanged.

7 Q. EXPLAIN THE PROCEDURE FOR REQUESTING THAT AN ACTIVITY OR
8 PROJECT BE PROVIDED BY TXU BUSINESS SERVICES TO ONE OR
9 MORE ENTITIES.

10 A. Activities or projects may be initiated in several ways:

- 11 1) A client of TXU Business Services, TXU Electric for example, may
12 request a specialized activity or project to meet a business need. TXU
13 Business Services creates a separate activity account code based on
14 the request of the client. The client is made aware of, and agrees to,
15 the estimated cost and the billing method before any expenses are
16 charged.
- 17 2) TXU Business Services may determine that costs should be identified
18 separately to better align the cost of the service with the cost
19 causation drivers and/or to better communicate the cost of the service
20 to the client. This may require that a new activity/project code be
21 created. TXU Business Services Management Support communicates
22 the change to the client, and the client has the opportunity to review
23 and approve the change before billings using the new activity/project
24 code are made.
- 25 3) TXU Business Services may initiate a separate activity or project to
26 assign the cost of a new service. These activities or projects are
27 typically established during the business planning cycle, and the client
28 has the opportunity to review and to agree or challenge the cost

1 assignment methodology of the new activity or project prior to
2 implementing the activity or project.

3 Q. WHAT TYPES OF COSTS ARE INCURRED IN PROVIDING SERVICES TO
4 TXU ENTITIES?

5 A. Expense categories include: salaries and wages; depreciation and
6 amortization; federal, state, and local taxes; income taxes; interest; outside
7 services; property insurance; injuries and damages; employee pension and
8 benefits; company membership dues; advertising; rents and leases; and
9 maintenance of structures and equipment.

10 Q. WHAT TYPES OF ASSETS ARE DEPRECIATED OR AMORTIZED BY TXU
11 BUSINESS SERVICES?

12 A. Depreciated assets include structures and improvements,
13 telecommunications structures, telecommunications equipment, automobiles,
14 office furniture and equipment, and computer equipment. Amortized assets
15 are primarily capitalized computer applications. I would note that TXU
16 Business Services' expenditures on capital assets are not billed until the
17 expense is recognized through depreciation or amortization.

18 Q. WHAT TYPES OF OUTSIDE SERVICES ARE PURCHASED BY TXU
19 BUSINESS SERVICES?

20 A. Outside services include, but are not limited to, contract programmers,
21 contract labor, attorneys, auditors, management consultants, public relations
22 consultants, and benefit plan administration. TXU Business Services may
23 utilize outside service providers in order to augment staffing levels during
24 peak work periods, enhance Company skill sets, or provide specialized
25 project expertise.

26 Q. LIST THE COMPONENTS OF EMPLOYEE PENSION AND BENEFIT
27 EXPENSE INCURRED BY TXU BUSINESS SERVICES ON BEHALF OF
28 TXU ENTITIES.

- 1 A. The components of pension and benefit expense include, but are not limited
2 to, retirement plans, thrift plans, life insurance, accidental death and
3 dismemberment insurance, dental insurance, hospitalization insurance,
4 prescription drug plan, HMO premiums, long-term disability, workers'
5 compensation, retiree health benefit costs, and educational reimbursement.
- 6 Q. CLASSIFY THE TYPES OF ADVERTISING PROGRAMS FOR TXU
7 ENTITIES.
- 8 A. Advertising programs include marketing, promotional, and safety.
- 9 Q. WHAT TYPES OF RENT AND LEASE EXPENDITURES ARE INCURRED
10 BY TXU BUSINESS SERVICES?
- 11 A. Rent and lease expenditures are made for, but are not limited to, office
12 space, automobiles, computer equipment, office equipment, and
13 communications equipment.
- 14 Q. ARE THERE EXPENDITURES MADE BY TXU BUSINESS SERVICES
15 THAT ARE NOT INCLUDED IN BILLINGS FOR SERVICES TO
16 SUBSIDIARIES OR DIVISIONS?
- 17 A. Yes. TXU Business Services may, as a matter of convenience, pay outside
18 vendors for goods or services provided to clients. These "convenience
19 payments" are not processed through TXU Business Services' service bill
20 since no service is rendered by TXU Business Services. TXU Business
21 Services is reimbursed, at cost, by the subsidiary or division for which the
22 convenience payment was made. TXU Business Services merely pays the
23 outside vendor's invoice as a convenience to the subsidiary or division and
24 then receives reimbursement for the amount paid to the outside vendor.
- 25 Q. BRIEFLY DESCRIBE HOW TXU BUSINESS SERVICES ACCOUNTS FOR
26 THE EXPENSES IT INCURS IN PROVIDING SERVICES TO TXU
27 ENTITIES.
- 28 A. As previously stated, TXU Business Services expenses are assigned to

activities/ projects. An activity or project has a defined scope of work, and the consumed resources are measurable. Activity and project expenses are replicated from the TXU Business Services general ledger to the Cost Distribution System, the automated application utilized for billing to clients. Activity and project expenses are introduced into the Cost Distribution System and identified under one functional area. The majority of activity and project expenses retain the service provider and activity/project identity as introduced into the Cost Distribution System, but some may be reconfigured through assignment of overheads, transfers between service providers, or standard rate charges between service providers.

Q. YOU HAVE MENTIONED ALLOCATION OF OVERHEADS, TRANSFERS BETWEEN SERVICE PROVIDERS, AND STANDARD RATE CHARGES BETWEEN SERVICE PROVIDERS. PLEASE EXPLAIN HOW OVERHEAD COSTS ARE ASSIGNED.

A. Overhead costs consist of expenses that cannot be specifically identified and directly assigned to a service provider. Overhead costs are spread to activities and projects based on relative total dollars or relative labor dollars. The choice of total or labor dollars is based upon which method is more appropriate to properly distribute the overhead cost in question.

Q. EXPLAIN THE USE OF INTERNAL TRANSFERS BETWEEN SERVICE PROVIDERS WITHIN TXU BUSINESS SERVICES.

A. Transfers between service providers within TXU Business Services are primarily used to: 1) apply TXU Business Services senior management administrative costs to activities; 2) record services provided between service providers that are billed at actual cost rather than standard rates; and 3) combine activities across functional areas into processes.

Q. EXPLAIN THE MEANING AND PURPOSE OF STANDARD RATE CHARGES BETWEEN VARIOUS SERVICE PROVIDERS WITHIN TXU

1 BUSINESS SERVICES.

2 A. Charges are recorded between service providers in order to more accurately
3 communicate the total cost of providing a given service. For example,
4 Environmental Services consumes mainframe computer time while serving
5 client companies. The cost of the mainframe computer time consumed is
6 billed from Information Technology to Environmental Services and is
7 included in the bill from Environmental Services to client companies. The rate
8 billed between TXU Business Services service providers is the same rate
9 charged to other TXU entities.

10 Q. DOES THE USE OF STANDARD RATES AND UNITS CONSUMED IN THE
11 BILLING PROCESS RESULT IN BILLINGS THAT TEMPORARILY DIFFER
12 FROM ACTUAL COSTS?

13 A. Yes. The use of standard rates and units consumed results in a temporary
14 over- or under-recovery of the actual cost to provide the service.

15 Q. HOW ARE THE TEMPORARY DIFFERENCES BETWEEN COSTS
16 INCURRED AND COSTS BILLED HANDLED BY TXU BUSINESS
17 SERVICES?

18 A. Over- or under-recovered costs are placed in a deferred account at the end
19 of the month. The over- or under-recovered costs are identified by activity or
20 project. On a quarterly basis, the over- or under-recovered costs are
21 reviewed and, if significant, are billed to clients (either as a debit or credit)
22 through an adjustment based on the relative consumption of the activity or
23 project by client. At year-end, the over- or under-recovery is always cleared
24 to zero through the same adjustment process, thus ensuring that only actual
25 costs are paid.

26 **IV. TXU BUSINESS SERVICES PRICING OF SERVICES**

27 Q. HOW ARE TXU BUSINESS SERVICES' EXPENSES CHARGED TO
28 CLIENTS?

1 A. There are two basic means by which TXU Business Services' expenses are
2 charged to its clients: direct billing and assignment of costs.

3 Direct billing refers to those activities/projects where the service is
4 performed for only one subsidiary or division. For example, Corporate
5 Services - Investor Reports/Related Services was directly billed 100% to
6 TXU Corp, as it is the only entity that has outside investors (with the
7 exception of preferred stock).

8 The assignment of costs, instead of direct billing, is necessary in
9 those instances where an activity/project captures costs related to a service
10 performed on behalf of multiple subsidiaries and divisions. In these cases,
11 costs are assigned to subsidiaries or divisions based on the principle of cost
12 causation.

13 Q. WHY ARE ALL ACTIVITIES AND DOLLARS NOT DIRECTLY BILLED?

14 A. TXU Business Services strives to directly bill expenses, but it can only do so
15 where an activity serves only one subsidiary or division. As I testified above,
16 the purpose behind the consolidation of functions into TXU Business
17 Services is that TXU Business Services can provide services to more than
18 one client at a total lower cost than would be incurred if each client were to
19 provide the service for itself. Thus, since consolidation of services is one of
20 the fundamental principles underlying the existence of an efficient service
21 organization, it is not surprising that TXU Business Services cannot direct bill
22 all activities. The purpose of any cost assignment methodology used by TXU
23 Business Services is to bill each subsidiary or division, as accurately as
24 possible, the costs that were incurred on behalf of that client. Because of the
25 different types of services involved, various different methods are used to
26 most closely assign the costs to the entity on whose behalf the costs were
27 incurred. For example, for many Human Resources activities, the most
28 appropriate billing methodology is the number of employees for each

1 subsidiary or division. As another example, for Information Technology
2 activities, the most appropriate billing methodology may be based on the
3 seconds of computer mainframe time used or the number of personal
4 computers utilized by each client. The total number of different cost
5 assignment methodologies should not be of concern; the proper focus
6 should be on whether, for each given activity, the cost assignment
7 methodology chosen reasonably assigns costs on a cost-causation basis.
8 Indeed, our commitment to properly assign costs is a cause of the relatively
9 large number of cost assignment methodologies. A description of the cost
10 assignment methodology used to assign costs for each activity billed to TXU
11 entities during the twelve months ended September 30, 1999, will be
12 provided in TXU Electric's April 1, 2000 Cost Separation Filing.

13 Q. FOR ANY GIVEN ACTIVITY, IS THERE ONLY ONE REASONABLE COST
14 ASSIGNMENT METHODOLOGY?

15 A. No. The need for the use of a cost assignment methodology reflects the fact
16 that the total costs in a particular activity were not incurred directly for, and
17 cannot readily be assigned directly to, only one subsidiary or division. For
18 any given activity, there may be one, or more than one, cost assignment
19 methodology that is a reasonable approximation of the basis upon which the
20 costs were incurred -- a matching of expenses to the cost drivers -- and that
21 can fairly and equitably be used to assign costs to the clients.

22 Q. HOW OFTEN IS THE COST ASSIGNMENT METHOD FOR EACH
23 ACTIVITY REVIEWED TO ENSURE THAT IT REMAINS A REASONABLE
24 COST ASSIGNMENT APPROACH FOR THAT ACTIVITY?

25 A. The cost assignment method used for billing is reviewed at least annually for
26 every TXU Business Services activity, as part of the budget process
27 described later. If necessary, the method may be reviewed more often.

28 Q. ARE THE COST ASSIGNMENT METHODOLOGIES USED BY TXU

1 BUSINESS SERVICES REASONABLE?

2 A. Yes. In all instances, the price charged to any TXU entity is no higher than
3 that charged by TXU Business Services to another TXU entity or to a non-
4 affiliated person for that same class of items. Where assignment
5 methodologies were used, they were applied consistently to determine
6 charges to all subsidiaries and divisions for a particular project or activity
7 code.

8 Q. HOW OFTEN ARE THE RESULTS OF THE COST ASSIGNMENT
9 METHODS REVIEWED TO UPDATE THE BILLING UNITS THAT ARE
10 USED?

11 A. The time period between review of the billing units -- or "billing metrics" -- for
12 each cost assignment methodology varies, depending on the activity
13 involved. The time period can be monthly, semi-annually, annually, or,
14 where the cost assignment methodology is based upon assignment of staff,
15 as often as every time a change in staff assignment is made.

16 Q. FOR EACH ACTIVITY, IS THE BASIS FOR THE COST ASSIGNMENT THE
17 SAME FOR ALL SUBSIDIARIES AND DIVISIONS?

18 A. Yes. TXU Business Services does not discriminate in the provision of
19 services to the subsidiaries and divisions of TXU Corp. For each activity that
20 is billed using a cost assignment methodology, the same methodology is
21 used for all expenses incurred under that activity, and thus TXU Business
22 Services bills each TXU entity on the basis of the same cost-causation
23 principle. This ensures that a particular TXU entity is not, and has not been,
24 charged a price higher than that charged by TXU Business Services to the
25 other TXU entities or non-affiliated third parties for the same class of items.

26 Q. EARLIER, YOU SPOKE ABOUT CHARGES THAT ONE SERVICE
27 PROVIDER WITHIN TXU BUSINESS SERVICES MIGHT CHARGE
28 ANOTHER SERVICE PROVIDER IN TXU BUSINESS SERVICES, USING

1 THE EXAMPLE OF MAINFRAME COMPUTER CHARGES. ARE THESE
2 STANDARD RATE CHARGES ALSO USED TO CHARGE SUBSIDIARIES
3 AND DIVISIONS FOR SERVICES RENDERED DIRECTLY TO THE
4 SUBSIDIARY OR DIVISION?

5 A. Yes. Continuing the use of the mainframe computer time example,
6 Information Technology will charge out for that time using a standard rate per
7 central processing unit (CPU) second. Within TXU Business Services,
8 Environmental Services may use the mainframe computer in order to provide
9 TXU Electric with some type of environmental service, and the cost of that
10 computer time will be billed from Information Technology to Environmental
11 Services, and then ultimately to TXU Electric via the Environmental Services
12 activity or project involved. However, TXU Electric (and the other TXU
13 entities) may also make direct use of the mainframe computer and be
14 charged for that use through the appropriate Information Technology activity
15 code. For any activity that is billed by service providers, the billing
16 methodology and rate will be the same for all clients, whether within TXU
17 Business Services or to other TXU entities.

18 Q. DOES THE SAME ADJUSTMENT OR TRUE-UP PROCESS THAT YOU
19 DESCRIBED EARLIER FOR STANDARD RATE CHARGES APPLY TO ALL
20 USERS OF ALL SERVICES THAT ARE BILLED USING A STANDARD
21 RATE CHARGE METHODOLOGY?

22 A. Yes. There is always a true-up to ensure that the actual costs -- and only the
23 actual costs -- are paid.

24 Q. DOES EACH BILLING METHODOLOGY, EITHER DIRECT ASSIGNMENT
25 OR A COST ASSIGNMENT METHODOLOGY, RESULT IN 100% OF THE
26 EXPENSES INCURRED BEING BILLED BY TXU BUSINESS SERVICES'
27 TO THE SUBSIDIARIES TXU CORP?

28 A. Yes. TXU Business Services is an "at-cost," rather than a "for-profit"

1 company. Ultimately, TXU Business Services recovers all of its costs from
2 its clients.

3 **V. STANDARD FOR AFFILIATE TRANSACTIONS**

4 Q. MR. RAGLAND, ARE YOU FAMILIAR WITH THE STATUTORY STANDARD
5 USED BY THE COMMISSION TO DETERMINE THE REASONABLENESS
6 OF EXPENSES ASSOCIATED WITH AFFILIATE TRANSACTIONS AND
7 THEIR INCLUSION IN RATES?

8 A. Yes. I have reviewed Section 36.058 of the Texas Utilities Code (PURA),
9 which sets out the basic affiliate transaction standard to be applied by the
10 Commission. Section 36.058 requires that each item or class of items
11 charged by an affiliate be found to be reasonable and necessary and not
12 higher than charges to a third party or other affiliate for the same item or
13 class of items.

14 Q.. WHAT ITEMS OR CLASSES OF ITEMS ARE PROVIDED BY TXU
15 BUSINESS SERVICES?

16 A. TXU Business Services provides numerous business services to subsidiaries
17 of TXU Corp. TXU Business Services captures the expenses incurred to
18 provide a particular service in an activity or project, and each of these
19 activities/projects constitutes a class of items.

20 Q. DOES THE USE OF ACTIVITIES/PROJECTS EASILY ALLOW FOR A
21 DETERMINATION AS TO WHETHER THE STATUTORY STANDARD HAS
22 BEEN MET?

23 A. Yes. As I have detailed above, each activity/project is evaluated to
24 determine its specific cost driver, *i.e.*, the number of employees served,
25 square footage utilized, number of desktop computers, etc. The cost driver
26 is then used to develop an appropriate billing methodology for assigning
27 costs to the recipient of that service. The division of services into
28 activities/projects, with a specific cost assignment methodology for each

1 activity/project, allows for easy regulatory review of each class of items to
2 ensure compliance with the statutory standard.

3 **VI. TXU BUSINESS SERVICES COST CONTROLS**

4 Q. HOW DOES TXU BUSINESS SERVICES CONTROL THE COSTS OF THE
5 SERVICES PROVIDED BY TXU BUSINESS SERVICES?

6 A. There are various means, including the budget process and monthly
7 variance reviews.

8 Q. DISCUSS THE OVERALL STRUCTURE OF THE BUDGET PROCESS FOR
9 TXU BUSINESS SERVICES.

10 A. The budgeting process for TXU Business Services is the final output of the
11 annual preparation of business plans. A comprehensive business plan is a
12 detailed and well thought-out description of how business unit managers
13 intend to operate the businesses within the unit. The business plan outlines
14 the strategic intent of the business unit and explicitly states the strategies
15 and implementation action plans for the business unit. Also included are
16 projected capital investments, projected revenues, and projected operating
17 costs.

18 Q. DURING THE BUDGET PROCESS, DOES TXU BUSINESS SERVICES
19 MEET WITH ITS CLIENTS?

20 A. Yes. TXU Business Services conducts formal planning sessions with clients,
21 including TXU Electric, prior to the calendar year being planned. Proposed
22 billing by TXU Business Services is reviewed with clients before being
23 finalized.

24 Q. WHAT BENEFIT IS DERIVED FROM PLANNING SESSIONS BETWEEN
25 TXU BUSINESS SERVICES AND ITS CLIENTS?

26 A. Planning sessions give TXU Business Services and its clients an opportunity
27 to negotiate service and service levels and to request services that are not
28 currently being provided. Also, such planning sessions ensure that services

provided by TXU Business Services are not duplicated by clients.

Q. DOES THE PLANNING PROCESS HELP ENSURE THAT BUDGETS ARE COST EFFICIENT?

A. Yes. The level of services planned to be purchased by a TXU entity from TXU Business Services is reviewed by that entity's mid-level managers who will be receiving the services requested. As a result of allowing TXU Business Services management and client management to review services provided by TXU Business Services, market forces are brought to bear on TXU Business Services. The level of expenditures proposed by all TXU entities receives further review as funding requests are evaluated, based on their relative contributions to corporate direction, by upper-level management.

Q. ARE TXU BUSINESS SERVICES BUDGETS REVIEWED FOR VARIANCES DURING THE YEAR?

A. Yes. TXU Business Services management reviews charges for their responsibility areas each month. Material variances are evaluated as to cause. If costs for a particular activity are increasing, actions are taken to reduce expense where possible. Permanent variances, either increases or decreases, are incorporated into a periodic revised budget projection reviewed by corporate management.

Q. OTHER THAN THE BUDGET PROCESS AND MONTHLY VARIANCE REVIEWS, WHAT OTHER STEPS DOES TXU BUSINESS SERVICES TAKE TO ENSURE THAT THE BUSINESS PROCESSES OR COSTS INCURRED BY TXU BUSINESS SERVICES ARE REASONABLE?

A. TXU Business Services has also utilized the management tool of "benchmarking," which is the process of comparing and measuring against other organizations in order to gain information on philosophies, policies, practices, and measures that can be utilized to increase performance.

1 Q. WHAT TYPES OF ENTITIES HAS TXU BUSINESS SERVICES
2 BENCHMARKED AGAINST?

3 A. Depending upon the service being examined, comparisons have been made
4 with other utilities, companies outside the utility industry, or some
5 combination thereof. Most of those studies have generally addressed
6 business processes, as opposed to specific costs, and provide a variety of
7 comparisons, in which TXU Business Services compares favorably. Those
8 studies also provide information used to continue to enhance established
9 efficient business processes.

10 Q. ARE THERE OTHER MEANS USED TO ENSURE THE
11 REASONABLENESS OF TXU BUSINESS SERVICES' CHARGES?

12 A. Yes. A significant portion of the services provided by TXU Business
13 Services is labor intensive. The Human Resources function within TXU
14 Business Services is active in comparing its compensation levels -- both
15 salaries and benefits -- to those of other firms in the Dallas - Fort Worth
16 metropolitan area and to other utilities and non-utility companies nationwide.
17 TXU Business Services utilizes the data and services of various consulting
18 firms to ensure that its salaries and benefits are competitive with, but not
19 excessive as compared to, those being paid by other large corporations with
20 which TXU Business Services must compete for job applicants.

21 Q. DOES CONSOLIDATION OF FUNCTIONS IN TXU BUSINESS SERVICES
22 ALLOW FOR THE SERVICES TO BE PROVIDED AT A LOWER OVERALL
23 TOTAL COST RELATIVE TO WHAT THE COST MIGHT BE IF THESE
24 SERVICES WERE NOT CONSOLIDATED?

25 A. Yes. It is obvious that duplicate staffs, equipment, and facilities can be
26 avoided through consolidation. For example, each TXU entity with
27 employees needs the services of a human resources department. Rather
28 than having multiple human resources departments, TXU Business Services

1 provides these types of services to clients through a single human resources
2 process. The same holds true for the other services provided by TXU
3 Business Services.

4 **VII. CONCLUSION**

5 Q. WHAT CONCLUSIONS HAVE YOU REACHED CONCERNING TXU
6 BUSINESS SERVICES' EXPENSES?

7 A. The costs incurred by TXU Business Services and billed to TXU entities --
8 both in total and for each class of items -- are reasonable and necessary;
9 include no equity return or profit; reasonably reflect the actual cost of
10 services to TXU entities; and are no higher than the prices charged to
11 another TXU entity, or to other unaffiliated companies, for the same class
12 of items.

13 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

14 A. Yes.

STATE OF TEXAS §
 §
COUNTY OF DALLAS §

BEFORE ME, the undersigned authority, on this day personally appeared Stephen N. Ragland, who, having been placed under oath by me, did depose as follows:

My name is Stephen N. Ragland. I am of legal age and a resident of the State of Texas. The foregoing direct testimony and the attached exhibits offered by me are true and correct, and the opinions stated therein are, to the best of my knowledge and belief, accurate, true and correct.

Stephen N. Ragland
Stephen N. Ragland

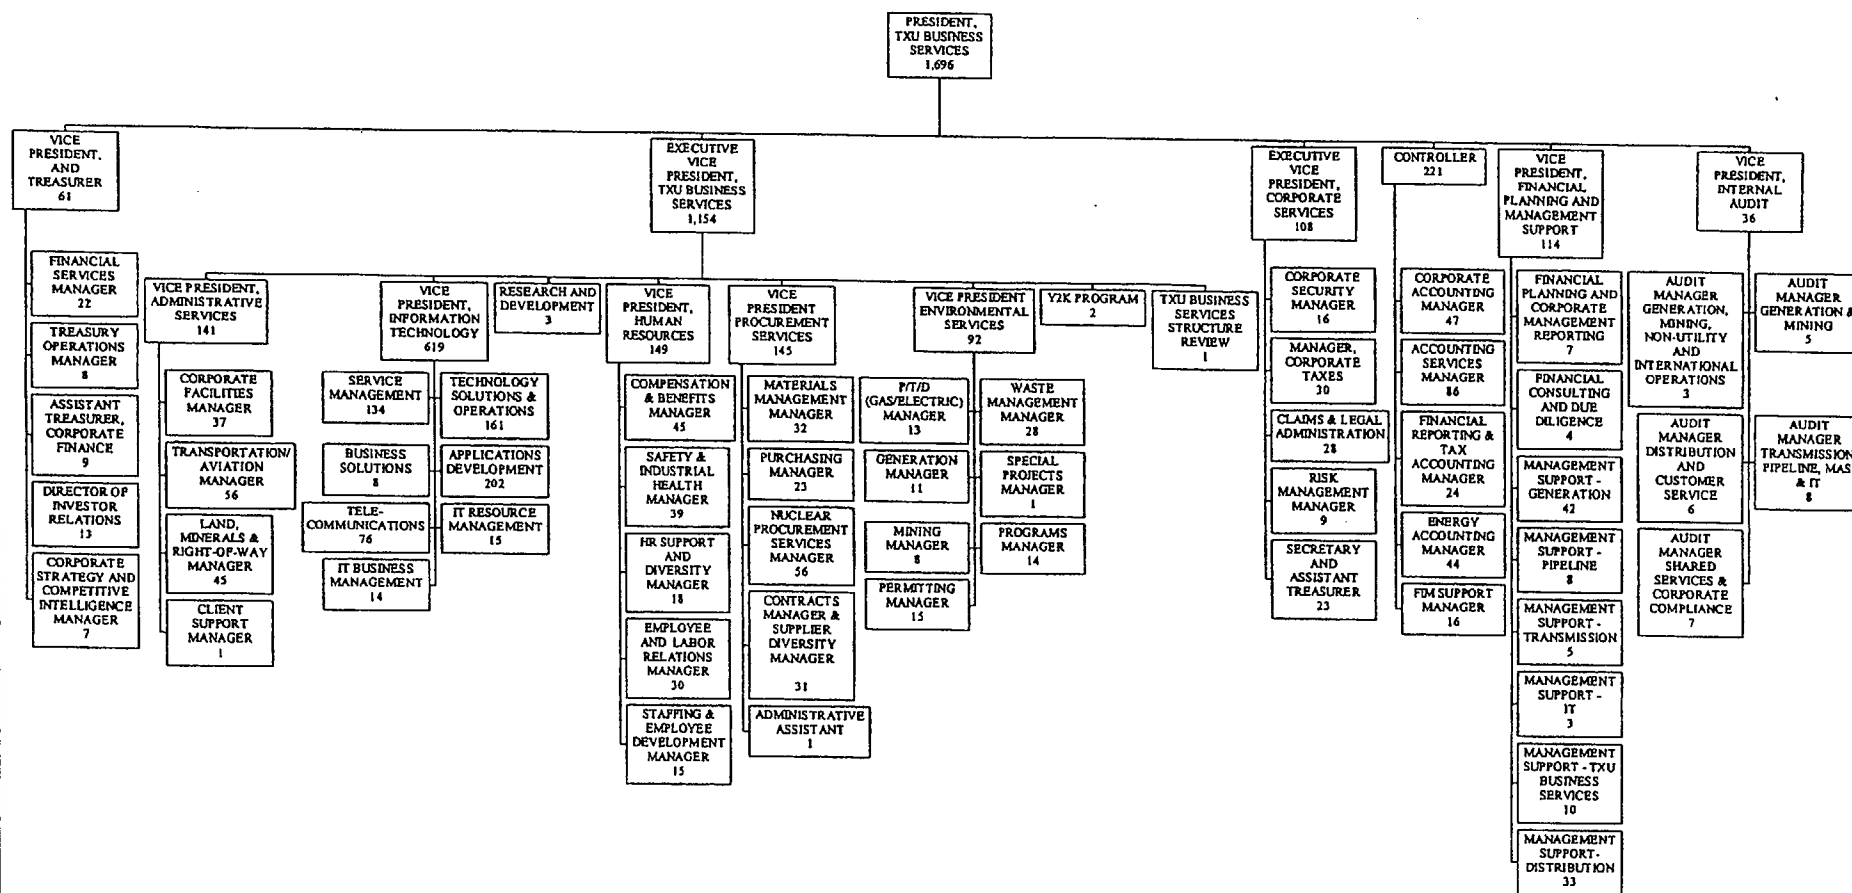

SUBSCRIBED AND SWORN TO BEFORE ME by the said Stephen N. Ragland this 7th day of January, 2000.

Teri Smart
Notary Public, State of Texas

FILING CLERK

March 30, 2000

Mr. James Galloway, Filing Clerk
Public Utility Commission of Texas
1701 N. Congress Avenue
Austin, Texas 78711

RE: PUC Docket No. 21950, SOAH Docket No. 473-00-0496, *Application of TXU Electric Company For Approval of Its Plan To Implement Business Separation As Required Under Section 39.051 of The Public Utility Regulatory Act.*

Dear Mr. Galloway:

Enclosed for filing in the above-referenced case please find the requisite number of copies of the "Supplemental Direct Testimony of Thomas L. Baker."

Please note that the only change from his Direct Testimony that Mr. Baker's Supplemental Testimony reflects is that TXU Electric now plans to unbundle its transmission and distribution operations into separate transmission and distribution utilities.

I am sending a copy of this letter and the enclosure to all parties of record. Thank you for your attention to this matter.

Sincerely,

Jo Ann Biggs

1 **SUPPLEMENTAL DIRECT TESTIMONY OF THOMAS L. BAKER**

2
3 **I. INTRODUCTION**

4 Q PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND CURRENT
5 EMPLOYMENT POSITION.

6 A. My name is Thomas L. Baker, and my business address is 1601 Bryan
7 Street, Dallas, Texas. I am President of the Distribution Business Unit,
8 and in that capacity I am President of the Electric Service Division of TXU
9 Electric Company ("TXU Electric"), President of TXU SESCO Company
10 ("TXU SESCO"), and President of TXU Gas Distribution, a division of TXU
11 Gas Company. I also serve as a member of the Board of Directors of TXU
12 Electric, as a member of the Board of Directors of TXU Gas Distribution, a
13 division of TXU Gas Company, and as a member of the TXU Corp
14 Operating Committee.

15 Q. ARE YOU THE SAME THOMAS L. BAKER THAT FILED DIRECT
16 TESTIMONY FOR TXU ELECTRIC IN DOCKET NO. 21950?

17 A. Yes, I am.

18 **II. PURPOSE OF SUPPLEMENTAL DIRECT TESTIMONY**

19 Q. PLEASE DESCRIBE THE PURPOSE OF YOUR SUPPLEMENTAL
20 DIRECT TESTIMONY IN THIS PROCEEDING?

21 A. The purpose of my supplemental direct testimony is to amend TXU
22 Electric's Business Separation Plan by providing additional information
23 clarifying the future organizational structure of TXU Electric's current
24 transmission and distribution operations and discuss the legal structure of
25 the newly-created affiliated companies.

26 **III. 2002 UNBUNDLED ORGANIZATION AND SERVICES**

27 Q. PLEASE DESCRIBE THE ORGANIZATIONAL STRUCTURE AFTER THE
28 SEPARATION OF BUSINESS ACTIVITIES ON JANUARY 1, 2002.

29 A. Exhibit TLB-5 in my direct testimony shows the proposed TXU Corp
30 corporate structure to accomplish separation of the business activities of
31 TXU Electric and indicates that the regulated transmission and distribution

1 utility will be one company owned by the holding company, TXU Corp.
2 Rather than have one utility that provides both transmission and
3 distribution, we have now decided to create separate transmission and
4 distribution utilities, as permitted by Utilities Code § 39.051(c), to be
5 owned by TXU Corp. The attached Exhibits TLB-S-1, TLB-S-2, and TLB-
6 S-3 reflect this change and replace Exhibits TLB-3, TLB-4, and TLB-5,
7 respectively, in my direct testimony.

8 Q. WHAT IS THE PROPOSED SCHEDULE FOR TXU ELECTRIC TO
9 UNBUNDLE ITS TRANSMISSION AND DISTRIBUTION OPERATIONS
10 INTO SEPARATE TRANSMISSION AND DISTRIBUTION UTILITIES?

11 A. TXU Electric fully intends to have the separation of its transmission and
12 distribution operations accomplished by January 1, 2002. However, if for
13 some reason we are unable to meet this schedule, the regulated
14 transmission and distribution operations will continue to be performed as
15 two divisions of one wire company until the legal separation between
16 transmission and distribution can be completed. Since the unregulated
17 business activities will be separated from the regulated utility activities by
18 January 1, 2002, TXU Electric will still be in compliance with Utilities Code
19 § 39.051 if the regulated transmission and distribution operations remain
20 in the same company for a short period of time.

21 Q. WHAT WILL BE THE LEGAL STRUCTURE OF THESE UTILITIES AND
22 THE NEWLY-CREATED AFFILIATED COMPANIES?

23 A. The transmission utility and the distribution utility will each be separate
24 Texas corporations. The power generation company, the retail electric
25 provider, and the portfolio management and trading company will be
26 corporations.

27 Q. WILL THIS ORGANIZATIONAL CHANGE IMPACT HOW TXU ELECTRIC
28 SEPARATES ITS CURRENT BUSINESS ACTIVITIES?

29 A. No. All business activities that we originally proposed to be performed by
30 the transmission and distribution utility will now be performed in either the
31 transmission utility or the distribution utility.

1 Q. DOES THIS CHANGE HAVE ANY IMPACT ON THE REST OF TXU
2 ELECTRIC'S BUSINESS SEPARATION PLAN?

3 A. No. All other aspects of the Business Separation Plan remain as I
4 described them in my direct testimony in this proceeding. In addition, any
5 reference in any other witness' direct testimony in this proceeding to a
6 single transmission and distribution utility should now be read to refer to a
7 separate transmission utility and a separate distribution utility.

8 **IV. CONCLUSION**

9 Q. PLEASE SUMMARIZE YOUR SUPPLEMENTAL DIRECT TESTIMONY.

10 A. My supplemental direct testimony provides a revision to TXU Electric's
11 Business Separation Plan concerning the organizational structure of TXU
12 Corp's regulated transmission and distribution utilities after January 1,
13 2002. As illustrated in my Exhibit TLB-S-3, TXU Electric now plans to
14 unbundle its transmission and distribution operations into a separate
15 transmission utility and a separate distribution utility.

16 Q. DOES THIS CONCLUDE YOUR SUPPLEMENTAL DIRECT
17 TESTIMONY?

18 A. Yes, it does.
19

STATE OF TEXAS §
 §
COUNTY OF DALLAS §

BEFORE ME, the undersigned authority, on this day personally appeared Thomas L. Baker, who, having been placed under oath by me, did depose as follows:

My name is Thomas L. Baker. I am of legal age and a resident of the State of Texas. The foregoing supplemental direct testimony and the attached exhibits offered by me are true and correct, and the opinions stated therein are, to the best of my knowledge and belief, accurate, true and correct.

Thomas L. Baker

SUBSCRIBED AND SWORN TO BEFORE ME by the said Thomas L. Baker this 28th day of March, 2000.

PUBLIC UTILITY COMMISSION

OF TEXAS

**INTERIM ORDER – PHASES III & IV
T&D REVENUE REQUIREMENT, COST ALLOCATION, TXU BUSINESS
SEPARATION, AND EXCESS MITIGATION OF STRANDED COSTS**

This Order addresses TXU Electric Company's (TXU or the Company) transmission and distribution revenue requirement, cost allocation, business separation plan, and excess mitigation of stranded costs.

Except to the extent provided in this Order, the Public Utility Commission of Texas (Commission) adopts the proposal for decision (PFD), including findings of fact and conclusions of law, issued on March 14, 2001 and amended on April 12, 2001,¹ by the administrative law judge (ALJ) for the State Office of Administrative Hearings (SOAH). The Commission adopts the PFD with certain modifications.

I. Procedural History

In 1999, the Texas Legislature passed Senate Bill 7 (SB7)² instituting retail competition in the electric industry. SB7 requires electric utilities to unbundle their business functions and establish transmission and distribution (T&D) rates to various non-bypassable "wires" charges to reflect costs

¹ The ALJ's corrections were contained in a memorandum dated April 12, 2001, to Stephen Journeay, Director, Policy Development Division, filed with the Public Utility Commission of Texas on April 12, 2001.

² Tex. S.B. 7, 76th Leg., R.S. (1999) codified at Tex. Utilities Code Ann. § 11.001-64.158 (Vernon 1998 & Supp. 2001).

1302

Moreover, the Commission finds that TXU SESCO shall submit an annual compliance filing to ensure that excess earnings for 1999, 2000, and 2001 have been spent in compliance PURA § 39.255. The compliance filing pursuant to the 1999 annual report shall be made by June 30, 2001, and future compliance filings shall be made by March 31 of the year following the filing of the annual report.

III. FINDINGS OF FACT

Procedure and Parties

1. TXU Electric Company (TXU or the Company) is an integrated investor-owned utility providing electric service in Texas within the Electric Reliability Council of Texas (ERCOT).
 2. TXU filed this application on March 31, 2000, in accordance with the requirement of the Public Utility Regulatory Act, TEX. UTIL. CODE ANN. (Vernon 1998 & Supp. 2001)(PURA) that it unbundle its business functions. This case will establish TXU's unbundled cost of service (UCOS) transmission and distribution (T&D) rates for the rate year 2002.
 3. TXU published notice of this proceeding once each week for four consecutive weeks in newspapers of general circulation in each county in which TXU provides electric service. Newspaper notice was completed by June 25, 2000. In addition, TXU mailed direct notice as a bill insert to each affected retail customer; direct notice was completed on June 15, 2000. A copy of the notice was mailed to all wholesale customers and annual planned wholesale transmission service customers and to each municipality served by TXU on May 18, 2000.
 4. This docket was referred by the Public Utility Commission of Texas (PUC or Commission) to the State Office of Administrative Hearings (SOAH) on April 3, 2000, for assignment of an administrative law judge to conduct a hearing and issue a proposal for decision. Following the
-

131A. In accordance with Order No. 17 in Docket No. 22344, a utility may recover reasonable and necessary rate case expenses that are related to the transmission and distribution functions, including those incurred prior to January 2002.

132. Deleted.

132A. Consistent with its determination in Docket No. 22355, the Commission finds it reasonable to apportion TXU's Electric expenses using the net asset functionalization factor. Using this methodology, 38.3% of TXU's Electric requested rate case expenses are attributable to the transmission and distribution functions and are recoverable as a result. TIEC Ex. 11 at 15-16.

132B. It is reasonable for TXU to recover rate case expenses through the annual report required by PURA § 39.257 for the calendar year 2001. Should TXU not have earnings in its annual report sufficient to cover the entire amount of recoverable rate case expenses, TXU may petition the Commission for other relief, including approval of the recovery of the remaining amount as a regulatory asset.

BUSINESS SEPARATION PLAN

133. The TXU Business Separation Plan (BSP) calls for all business activities currently performed by TXU to be performed either by the regulated T&D utilities, a separate power generation company, a REP, a portfolio management and trading company, or the current activity will be discontinued. TXU will create separate affiliated companies owned by a common holding company and separate transmission and distribution utilities, as permitted by PURA § 39.051(c) that will be Texas corporations owned by TXU Corporation. The power generation company, the REP, and the portfolio management and trading company will be corporations, and a new subsidiary of TXU Corporation will be created to hold these entities.

133A. TXU may elect to keep the transmission and distribution operations together in one utility after January 1, 2002.

134. Allowing generation facilities currently in rate base to be “eligible facilities” as defined in the federal Public Utility Holding Company Act of 1935 (PUHCA), 15 U.S.C. § 79z-5a, will benefit consumers, is in the public interest, and does not violate Texas law.
135. The Commission does not express an opinion as to the reasonableness of TXU’s market valuation of generation assets for purposes of the true-up under PURA § 39.252.
136. TXU anticipates it and TXU Corporation will need to purchase the securities of the future TXU transmission utility in order for it to be a wholly-owned subsidiary of TXU Corporation. This approval of the BSP constitutes an express authorization to acquire those securities.
137. As part of the implementation of its BSP, TXU will transfer the Comanche Peak Steam Electric Station (CPSES), the Nuclear Regulatory Commission license to operate CPSES, the nuclear decommissioning trust funds associated with CPSES, and the right to future decommissioning collections concerning CPSES to its power generation company. Following implementation of the TXU BSP, the TXU power generation company will assume the decommissioning liability associated with CPSES.
138. The TXU Distribution Utility will collect from its customers the decommissioning costs on behalf of the TXU power generation company and transfer all collected amounts to the TXU power generation company. The TXU power generation company will contribute all nuclear decommissioning collections to its nuclear decommissioning trust funds.
139. As part of its unbundling under PURA § 39.051, TXU will create separate transmission and distribution utilities. Each utility should have a separate CCN number for its wires facilities. The existing CCNs that cover both the transmission and distribution facilities should stay with the Distribution Utility on January 1, 2002. It is necessary; therefore, for the Commission to issue a new CCN to the future TXU transmission utility for all of the transmission facilities for which TXU currently holds a CCN, including the transmission facilities of TXU SESCO

that will be transferred to TXU effective December 31, 2001 under the Commission's Order in Docket No. 21850.

Decommissioning Costs

140. The Commission finds that the total market value of the decommissioning fund for both Comanche Peak nuclear units is \$264,437,398, which takes into account the after-tax market value for these plants. This fund balance includes the \$71,214,203 in market value over book value shown on TXU Schedule II-B-12, p. 1, Account 2545000.
141. The reasonable rates of return to be imputed to the decommissioning fund balances are as follows: for years 2000-2025, 6.88%; 2026-2034, 5.56%; and 2035, and after, 4.04%. These are based on an equity return of 10.92%.
142. In determining the equity return, it is appropriate to consider the broadest possible period of time in order to observe various financial and economic characteristics. The Ibbotson returns for years 1926 through 1999 provide a reasonable measure of equity returns.
143. No parties contested the escalation rate for the nuclear decommissioning costs. Therefore, the reasonable rates are those proposed by TXU—4.81% for CPSES Unit 1 and 4.60% for Unit 2, resulting in a weighted average escalation factor of 4.68% for both units.
144. The Company's portfolio mix for the decommissioning fund is 60% equities, 39% fixed income, and 1% cash in 1999 through 2015; 30% equities, 55% fixed income, and 15% cash from 2026 through 2034; and 50% fixed income and 50% cash for 2035 and thereafter.

System Benefit Fund Fee

145. The Commission finds that the System benefit fund fee fund is \$51,174,456 (Schedule I-A(D), p. 1 and Schedule WP/1-A(D)/1), which is based on a Commission approved rate of \$.50 per megawatt-hour.

Nuclear Decommissioning Fund/Disposal and Removal Costs

146. Nuclear Regulatory Commission (NRC) regulations do not prohibit the states from collecting additional funds in the trust fund for other decommissioning activities such as site restoration. The Commission has consistently included these costs in the decommissioning trust fund.
147. Costs associated with site restoration do not include returning the site to a "pristine" condition, but rather to return it to a stable, safe condition by dismantling structures that have already been significantly damaged from removal of radioactive material and by grading after dismantling.
148. TXU will be responsible for the costs associated with moving and storing spent fuel during the license termination process. Therefore, these costs should be included in the decommissioning expense calculation.
149. TLG Services, Inc., (TLG) cost estimate assumed that no scrap can be salvaged from Comanche Peak once it is dismantled. No positive value was assumed for the scrap primarily due to the off-setting expense of surveying required to verify to a 100% confidence level that material leaving the site has no detectable radionuclide contamination. While no positive value was assumed for the scrap, its inherent value was considered through the offset of disposal costs.
150. TXU will make economically reasonable efforts to salvage equipment during decommissioning, but placing a salvage value on the machinery and equipment at this time would be speculative. Furthermore, the salvage value would be small in comparison to overall decommissioning expenses. It is difficult to predict the remaining life of the equipment that will be on site when decommissioning begins, and it is difficult to predict the market for used equipment that long into the future. Any value received from sale of the material would be more than off-set by the on-site processing costs.

151. The TLG report clearly explains the reasons for not including scrap value in the decommissioning cost estimate; that explanation reflects a reasonable treatment of this matter, and no adjustment should be made to place a value on scrap as a reduction to decommissioning expense.
152. Ratepayer funds collected in advance of decommissioning should be returned to the ratepayers in the event that the Comanche Peak nuclear site is not returned to greenfield condition and that some other, less expensive, form of decommissioning is ultimately pursued. The method for such refunding should be determined at a future date.

Service Reliability

153. TXU has implemented strategies that have resulted in lower capital and maintenance expenses. TXU is prioritizing its vegetation management for the worst performing SAIDI and SAIFI feeders on a geographical basis to minimize expenses associated with crew relocations. The Company has instituted other measures to improve efficiency in vegetation management areas. Consequently, no Commission action is necessary at this time to address TXU's plant maintenance and service reliability.

COST ALLOCATION AND RATE DESIGN

Local Gross Receipts Taxes

154. The goal of the Commission is to institute, to the extent possible, a generic rate design that would honor the principles of cost causation, simplicity, and equity to customers within the given rate classes.
155. Local gross receipts tax (LGRT) is a tax or fee on the franchise arrangement whereby the T&D utility uses city streets, alleys, and rights-of-way to erect poles and run wires for delivery of electricity to the utility's customers within the municipal boundaries.
156. The LGRT legislation requires the tax be based on the number of kWh delivered within the municipal boundaries in order to maintain sufficient revenue levels for the cities. To meet this

purpose, especially given the potential offsetting effect from the Commission's decision regarding the over-funded pension plan discussed in FOF Nos. 68-71A. However, the final rates to be approved by the Commission for the period beginning January 1, 2002 shall include this adjustment to invested capital.

IV. Conclusions of Law

1. TXU Electric is an electric public utility as defined in § 11.004 and § 31.002 of the Public Utility Regulatory Act (PURA), TEX. UTIL. CODE ANN. §§ 11.001–64.158 (Vernon 1998 & Supp. 2001).
2. The Commission has jurisdiction over this matter pursuant to PURA §§ 14.001, 32.001, 36.001, 39.051, and 39.201.
3. SOAH has jurisdiction over matters related to conduct of the hearing and preparation of a proposal for decision in this proceeding, pursuant to PURA § 14.053 and TEX. GOV'T CODE ANN. § 2003.049 (Vernon 2000).
4. Appropriate notice of this application and hearing was provided in compliance with TEX. GOV'T. CODE ANN. §§ 2001.051 and 2001.0552, PURA § 36.103, and P.U.C. PROC. R. 22.51.
- 4A. The Commission conducted this docket in accordance with the requirements of the Administrative Procedure Act³³ and with the provisions of PURA.³⁴

Revenue Requirement

5. The revenues set forth in the Commission Revenue Requirement Schedules meet the PURA § 36.051 requirements that the Commission fix a utility's overall revenues at a level that will

³³ *Tex. Gov't Code Ann. §§ 2001.001 et seq. (Vernon Pamph. 2000).*

³⁴ *Public Utility Regulatory Act, Tex. Util. Code § 11.001-64.158 (Vernon 1998 & Supp. 2001).*

16. TXU's costs are appropriately assigned to the transmission and distribution utilities and TXU affiliates as described in its application and modified by the findings of fact.

Business Separation Plan

17. TXU's proposed organization after restructuring complies with the provisions of PURA § 39.051 and P.U.C. SUBST. R. 25.341-343 and 25.346.
18. Allowing the generation facilities that are currently in TXU's rate base to be eligible facilities as defined by 15 U.S.C. § 79z-5a (1) will benefit consumers, (2) is in the public interest, and (3) does not violate Texas law.
19. The Commission's approval of TXU's BSP constitutes express authorization of the acquisition of securities of the TXU transmission utility by TXU and TXU Corporation as necessary to accomplish that BSP.
20. TXU's nuclear decommissioning fund complies with P.U.C. SUBST. R. 25.231(b)(1)(F) and 25.301.

Rate Design

21. The allocation of costs to the customers classes established by TXU as modified by the findings of fact comply with P.U.C. SUBST. R. 25.344(h) and PURA § 36.003(b) and is reasonable, not unreasonably preferential, prejudicial, or discriminatory.
22. Collecting LGRT in base rates by employing the direct/spread method for allocating and collecting the LGRT with the in-city revenues calculated using the energy allocator, is reasonable and permits municipalities to recover the appropriate level of revenues as provided in PURA § 33.008(b).
23. The forecasted billing determinants established in this order are reasonable.
24. TXU's proposed non-bypassable charges, including the proposed Riders for nuclear decommissioning, system benefit fund fees, and other non-bypassable charges, the rider SE
